

Boiler and Hot Water Plant Replacement for a Keighley School

Project Details

Completed	2020
Sector	Education
Location	Keighley
Type	Mechanical Services

Watsons Building Services Ltd completed a phased project involving the removal and replacement of old boiler and hot water plant systems and controls. The project also encompassed electrical works and integration with a Building Management System.

Project Scope

- ▶ New gas service, boilers, and protective heat exchanger.
- ▶ New plant room installed, old systems removed, and asbestos was removed.
- ▶ Pump sets, calorifiers, BMS controls, and pipework added.
- ▶ Upgraded power supplies, control wiring, and new lighting.
